

Who can manage Special Education with a comprehensive Multi-Tiered System of Support including flexible progress monitoring and transition support curriculum?

Manage Special Education to Go Beyond Efficiency to Greater Educational Effectiveness

We feel your pain! The first electronic IEP was created decades ago and the process still seems impossible! By using the same old IEP systems on the market, it costs a school district way too much money and takes too many systems to really meet the demands of NCLB and IDEA. And it still takes staff way too long to fill out ARD documents and complete IEPs.

For this reason, **Excent** went all the way back to the drawing board to build **Enrich**[®]. We started with the critical components of a best practices approach for designing an education plan for a student, and then mapped it to compliance requirements. This leads to a streamlined, standards based IEP that deploys all the right interventions, strategies and progress monitoring tools a teacher really needs to get results and make decisions.

Enrich[®] **Special Education** is a comprehensive online solution providing a guided IEP process for full compliance and a complete Multi-Tiered System of Support (MTSS) with instructional support features including **progress monitoring, response to intervention (RtI), Medicaid reimbursement, assessment analysis** and **longitudinal tracking**. SPP Indicator Reporting and Analytics is also available. In most cases, **Enrich** with all of the additional functionality and flexibility costs the same or less than your current special education solution.

"You ALL gave us a product we are going to LOVE! You have made a difference for teachers. Enrich is functional, easy to use and will enable us to meet state compliance with much less effort. When teachers have to spend less time writing IEPs and meeting compliance standards they can spend more of their time with their students, which makes a difference for kids! At the end of the day it's the students in Aurora Public Schools who benefit from all your hard work!"

Michelle Kennard,
Exceptional Student Services Coordinator
Aurora Public Schools, CO

The Enrich Special Education Advantage

- Save time and money – automate all your critical case management processes, including state child count reporting, annual IEP review tracking and more
- Customize forms, letters and reports to your district's exact specifications
- Simplify your process – enter data once and it is available throughout the system to generate forms, letters and reports
- Implement meaningful progress monitoring

Increase Student Involvement in Transition Planning

Effective transition planning and increasing graduation rates is a big challenge in special education, but in coordination with **Enrich® Special Education**, Excent has designed the **MyGraduationPlan™** web-based application to get students and parents more involved in the IEP transition process. When students begin to own their transition from school they are empowered to reach their potential and live their dreams.

Extra Mile Customer Service

Behind all of our data solutions is our renowned implementation training and customer service. Each customer is assigned a client shepherd who is not only available for questions, but proactively communicates and provides support to maximize your use of **Enrich® Special Education**. Included in our customer support is an online video library of training sessions available 24/7 so training can be based on your availability.
