Excent Medicaid Puts an End to Manual Processes and Cumbersome Paper Forms

Since 1998, we have partnered with school districts around the country helping them to recover over $100 million in Medicaid reimbursement funds.

Excent offers solutions that work with a school district's existing IEP system, as well as our proprietary IEP applications which incorporate encounter logs. Regardless of which IEP system a district uses or the method of documenting service provision, our billing tools extract encounter data for IEP/IFSP prescribed services, validate them against state and federal compliance requirements, and successfully bill a state's agency for Medicaid-eligible students.

Using Excent Medicaid, school districts reduce paperwork and errors, while increasing reimbursements and the amount of time therapists can spend with students.

The Excent Medicaid Advantage

Our solutions do more than simply track services provided to Medicaid-eligible students; they automate every aspect of the Medicaid management process.

Excent's comprehensive systems track parental consents and students' Medicaid eligibility, integrating prescribed service and transportation logs with an extensive billing tool to ensure identification of, and successful reimbursement for, every eligible student.

A combination of system features and reports provide program managers with superior program clarity through recent activity audit trails, ad hoc and custom reports, and comprehensive service provider and student data to support effective program management and cost recovery.
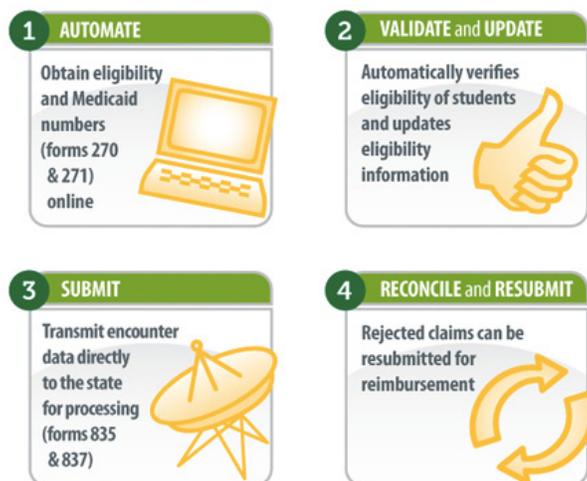

These robust management and compliance features provide tangible benefits for program directors, service providers, and district financial staff.

Service Logging

Excent's mobile web-based applications improve staff productivity and satisfaction with comprehensive, easy-to-use functionality, freeing time for more student interactions. It also supports staff efficiency with effective scheduling, role-based security, transportation tracking, and caseload management features.

Combined, these features promote:

- Faster entry of encounters
- Higher percentage of sessions documented
- Real-time encounter logging
- Increased accuracy of logged data
- Improved program implementation and maintenance
- Reduced provider training

1 AUTOMATE
Obtain eligibility and Medicaid numbers (forms 270 & 271) online

2 VALIDATE and UPDATE
Automatically verifies eligibility of students and updates eligibility information

3 SUBMIT
Transmit encounter data directly to the state for processing (forms 835 & 837)

4 RECONCILE and RESUBMIT
Rejected claims can be resubmitted for reimbursement

Getting Started

It's never been easier to start billing with confidence. Partner with Excent Medicaid, the most cost-effective and comprehensive Medicaid reimbursement solution, to maximize your district's Medicaid reimbursement.

To learn more about how our Medicaid service offerings can help your school district achieve optimal reimbursement for school-based health services, contact Excent today.
